Statement of Purpose

Through this letter of intent, I am going to elaborate my university study along with my job experiences and my future career objectives. I will also explain with supportive reasons why I choose Australia as my destination country.

I am XXXX, born in 1983 Jan 13, son of XXXX, permanent resident of Kathmandu, Nepal. I completed my School leaving certificate (SLC) in 1999 scoring 74%, Intermediate Level in 2001 securing 64.76%, Bachelor in Science in 2006 Securing 57.50% and Master in Physics in 2013 securing 57.89%. I am married and have a son of four years who is studying in LKG. My wife XXXX who has completed her 10+2 in education and has been working as a teacher in XXXX for three years.

During the period when I had completed my intermediate level, government took long duration to publish result and almost all the students from science faculty were also busy on preparing entrance examination for engineering. I was also busy on preparing entrance examination. During the period when I had completed my Bachelor in physics, there was only one university-Tribhuvan University (TU) which conducted master in physics and there were only 60 seats available. Due to this reason most of the physics students could not continue our further study. As soon as I completed my Bachelor level, I joined in a XXXX at Chhetrapati, Kathmandu as a secondary teacher in mathematics. My sincerity, dedication and hardworking were taken into account that led me to work with management team. My managerial skill and innovative methodology for the betterment and promotion of school were highly regarded and hence school management members offered me to work with them as a founder of school. My perpetual dedication, unbound credibility, critical and cut-edging idea for the upcoming progress and improvement of institution were being valued and recognized unaccountably. After the years of experience, acumen managerial skill, dexterity and far-reaching vision, I was finally appointed as the Managing Director (MD) of the school. I am also working XXXX as a part time teacher in the morning and evening shift. I have also attended many official meetings organized by district administration and Private Boarding School of Organization (PABSON) in order to run the institution smoothly, qualitatively and quantitatively.

It has been more than three years that I have been working as a managing director in my institution but I could not get real achievement and success that I am dreaming of. In order to get success and remove my weakness I had attended many seminars, meetings organized by PABSON and District Education Office (DEO) but I could not get into the core of success. After a lot of research I finally come to the

conclusion that all what I lack to run my institution smoothly, effectively and efficiently is due to my inefficient and insufficient knowledge regarding to administration and management. Now it is high time for me to get depth knowledge associated with management sector that leads me to take my institution into acme level. That is why I want to switch on my future career in MBA and Project management. This course is not only globally recognized and versatile but it will help me to get out of my problem that I have facing for more than three years. The master of Business Administration (MBA) assists me to develop my cognitive, technical, organizational, computing, problem solving and how to execute human resources, technical resources and financial resources timely, effectively and profitably. The Global Project Management (MPM) helps me to identify and solve organizational problems using a systematic decision, apply advance principles of project management and organizational development, execute strategic planning and best practices for cost and risk management, financial metrics, monitoring and evaluation. As I am owner of my own entrepreneur this dual course brush up my managerial skill, knowledge and business acumen that provides me to integrate business disciplines as well as project management with the advanced leadership and decision-making skills needed to excel in high-performing global organization. With this course I will acquire the business and management skills to evaluate, synthesize, analyze and apply the concept when leading unique projects on a multi-national scale.

Australia is the best destination for foreign students because of friendly environment, easy adaptation of weather, quality education, academic reputation, PSW, ESOS act, TPS system and OSHC. The degree acquired from Australia has a strong international reputation and is globally recognized. Australian education qualification is included under one national system-Australian Qualification Framework (AQF) which is easy for overseas governments to recognize our qualification. The Australian government provides PSW opportunities to all the international students which is the most influential part that attracts foreign students. PSW gives the opportunity to gain international work experience which will be beneficial for the students for their future career. Education Service For Overseas Student (ESOS) framework protects the right of international students studying in Australian including your right to receive, before enrolling, current and accurate information about the courses, fees, modes of study. Overseas students are protected by a Tuition Protection Services (TPS) under Australian Government Legislation. The Overseas Student Health Cover (OSHC) must be paid before student visa which entitles students to free hospital cover and 85% of standard doctor's fees. Besides, Australia is a beautiful country with plenty to see and do since more than 15% of the best cities are located in Australia.

I have researched about USA and UK as well. GRE and GMAT are mandatory for graduation students in USA which are very tough and hard to crack and it takes long time to prepare for international students. In USA and UK there is no Tuition Protection Scheme (TPS) and fees are not like Australia. The currency values of these countries are also very high as compared to Australia. My parents are also unwilling to

Regd: 78839/067/068

PAN : 304721146

send me USA as we heard multiple gun shoots occurred in USA. Approximately 1.4 million people have been killed using firearms in U.S between 1968 and 2011. Firearms were used to kill 13,286 people in the U.S in 2015. In U.S lots have gun ownership hence Robbery case is also higher in U.S. Crime rate in U.K is three times than in United States. On the other hand Australia is a peaceful country.

In Nepal there are only five accredited universities and to get admission in such universities is very tough because there is only limited number of seats but the competitors are from all around the country. On the other hand these universities need high requirements such as minimum 60% in under graduates and graduates. It also requires GMAT and KUMAT which are derivative of GRE and GMAT. Moreover, most of the universities are still conducting examination in yearly based not in semester based. The class sizes are quite big such that students have less class discussion and professors are unable to give individual attention to the students. Methodologies are still traditional and curriculums are completely theory based not research based.

Sydney has always become the most popular study destination for many international students from all over the world as it is a clean, safe, multicultural and cosmopolitan city. It is livable city with stability, health care, culture and environment, education and infrastructure. As my major is in MBA and Project Management so I need cosmopolitan city which is full of industries and companies such that I get easy access during my internship and research program. On the other hand, Sydney has the world pleasant climate condition with average temperature of 19 °C. The maximum temperature is 25 °C and minimum temperature is 10 °C like Kathmandu in Nepal.

Before XXXX University at Sydney I had gone through many other universities websites such as University of Tasmania, The University of Sunshine Coast at Brisbane, Victoria University at Sydney, South Wales University etc. Most of the university provides only single graduation either In Project Management or MBA but XXXX provides both graduations which is the field of my interest. Moreover, I have gone through the international feedback of pre-graduates and according to them the university provides full range of studying environment including library facilities, computer lab with free internet facilities and research facilities. Class size is comparatively small so that lecturers could pay attention to individual students and solve their problems instantly. XXXX has corresponded with lots of industries, national and multi-national companies which enhance direct career plan of the MBA students for their future internship as well as research program.

With lots of ambition I am applying Masters in MBA and Project Management which is complete two years course. After the completion of my graduation I will soon apply for Post Study Work (PSW) which provides international work experience working with international expertise. During PSW I will not only accumulate tons of experiences but it will also help me develop my attitude, communication skills and

my personality which all I need to run my own institution after I return my homeland. After PSW I will be full confident and well fit in my profession and I genuinely return to my country to take over my responsibility as a Managing Director of my own Institution. I will fully implement these methodologies, knowledge and skills in my own institution. My ambition is to reform my institution and convert it into university with international standard and curriculum. I want to add one more university in my country with international curriculum and methodologies. This will be fulfilled by the international degree and experience I will gain from this university.

I am married and I also want to take my spouse with me as a dependent so that she will support me in the household activities and I can give full time for my study. It will be easy for us to cope all the things together in new place and new environment. She has worked as a teacher for more than three years. I am well aware of my visa condition, my visa subclass is 500. I am completely well known and I will abide by all the rules and regulation imposed for the international students. I have to maintain 80% of attendance in each semester and have to cover by health insurance (OSHC). As per the rule international students are legally permitted to do work for 40 hours per fortnight.

I am well aware of my tuition fees, living expenses, OHS fees and travelling expenses including my dependent during my stay in Australia. So, my family and my laws family are going to sponsor me during my stay in Australia.

It will be my great honor if you give me an opportunity to enroll in your university and I will do my best to complete my course with excellent result. I will not leave any single blemish during my stay in Australia. I am looking forward to hearing your positive response.

Thank you

Yours Sincerely

XXXX
